Resonance

A contemplative listening room.

Generative audiovisual, music-led, slow time.

INSTALLATION BRIEF | KAREL BARNOSKI | MAY 2026

WHAT IT IS

A generative audiovisual instrument. Music-led. Slow time.

A composed piece of music drives real-time audio-reactive shaders and AI-curated imagery, producing a 20–40 minute slow-moving visual landscape that never repeats verbatim.

Originally built for personal listening. Scales naturally to a shared room: same engine, same patience, just larger and quieter.

THE ROOM

Planetarium vibes.
A dark space, audience reclining, eyes up.

SPACE	12×12 ft to 30×40 ft. Dome geometry welcome.
FLOOR	Mats and pillows. No chairs.
DISPLAY	Single overhead projection, dome, or large wall display.
AUDIO	4-corner speaker array. Stereo as a baseline.
FLOW	Visitors enter and leave on their own time. No timed entry. No headphones. No narration.

THE PIECE

A single ~30 minute Path.

Three to five composed tracks, threaded into one continuous arc.

01

Threshold

Open in near-silence. Single tone. Near-black field.

02

Expansion

Imagery surfaces. Music builds. Caustics, mandalas, figures.

03

Apex

Full motion and color. The room is loud and alive.

04

Return

Settle back toward stillness. Cycle resolves and begins again.

SHARE

A PATH · BY KAREL BARNOSKI

Welcome Home

the album as a journey

Thirteen tracks from Welcome Home, each one a journey. Walk through the record as an experience — from the first note of Interplay to the last breath of All Together.

Music by Karel Barnoski

0 OF 13

01 **Interplay**

A dreamy passage through memory and belonging in G Major

Soft iridescent veils part to reveal luminous pathways emerging from dawn haze. Floating islands of memory rise from mist, glowing warm as light diffuses through crystalline air.

PLAY →

02 **Bath**

A dreamy return to sanctuary

Mist curls through sanctuary chambers where water gardens float in soft light. Steam rises, pearlescent surfaces shimmer, and translucent veils part to reveal cascading reflections suspended in luminous vapor.

PLAY →

03 **Welcome Home**

A Musical Journey Through Karel Barnoski's Dreamy Homecoming

Soft glowing doorways emerge from mist, thresholds multiplying into radiant cathedral spaces. Golden light seeps through silk gradient skies as luminous pathways spiral upward toward transcendence.

PLAY →

04 **The Knife**

A mystical passage home through moonlit thresholds

Moonlit thresholds emerge from liminal fog, ancient stone rising through

PLAY →

Welcome Home — thirteen tracks, one ~30-minute path through the album

WHAT A VISITOR EXPERIENCES

Enters a dark room. Lies back. The first phase opens with a single low tone and a near-black field — slow caustics, the faint hint of a mandalic form. Imagery surfaces gradually as the music builds: water, light, figures that resolve and dissolve. Around the apex the room is full of motion and color; then everything settles back toward stillness. The visitor leaves when ready.

REFERENCES

A small canon.

Brian Eno

77 Million Paintings

Generative visual companion to ambient music. Proof that slow time finds an audience.

James Turrell

Skyspaces (1974–)

The dark contemplative room as primary form. No narrative scaffolding. Pure perception.

Ryoji Ikeda

test pattern · data.matrix

Sound and light as total sensorium. Room-scale, durational, austere.

WHERE IT DIFFERS

Composed first.
AI second.

The AI-image installation has become a genre — Anadol-flavored generative spectacle, large-format, often impressive, often hollow.

Resonance is the inverse. Each track is a written piece of music with intent. The visuals serve the music, not the other way around. AI sits inside the journey as a tool. It is not the headline.

WHY NOW

Slow attention is having a moment.

- Hiroshi Yoshimura's Music for Nine Post Cards hit the Billboard charts in 2024 — fifty years after release. Ambient music is mainstream again.
- Planetariums are reclaiming a cultural foothold. Hayden, Adler, and Morrison have all renovated and reopened their domes for contemporary programming.
- Sleep No More-era audiences trained themselves on long-form, low-direction experiences. The patience is back.

WHO

Karel Barnoski

Pianist · Composer · Designer

Pianist and composer. Released Welcome Home, a solo piano album self-produced during quarantine — the source material for many of the journeys in Resonance.

Design Director at Workday. 15+ years leading UX for enterprise products at Workday, GE, and Kodak. BFA Illustration and MFA Computer Graphics from RIT, with classical training from Barnstone Studios.

Founder of 2octave, an audio design studio specializing in product sonification. Award-winning sounds for products from digital cameras to kitchen appliances. Published in UX Magazine on the science of sound in product design.

Resonance is the current shape of a multi-year practice translating composed music into shared visual experience. The installation is the natural next room.

THE ASK

Let's talk.

A one-night event. A multi-week run. A residency.

A slot in an existing program. A conversation.

Whatever shape the fit takes.

Happy to ship a working prototype, or install in person.
